- Wayne's Pump Service, Demetri Mellos, 970-484-8588

WELDING/PLASMA

- Jeff Hutchinson, Livermore, 970-413-9787

WELL WATER TESTING

Below are links for **EPA Certified Labs** for analysis of well water. You may collect your own samples and do not need to hire private companies to collect or 'test' your water. (Beware of water analysis results from any company trying to sell you water treatment equipment).

Recommendations are to test your well water every few years for bacteria, (potability). You will need a sterile bottle to collect your potability sample in, and these are available through all three of the below links. Chemical and heavy metals analysis is also available through two of the below links. If you have questions, please feel free to reach out to Julie Schott at cmratreasurer2023@gmail.com

- Water potability analysis and sterile bottles @ lab on CSU campus
<http://www.ehs.colostate.edu/WEnviroQual/Home.aspx>

Lab location to pick up sterile bottle & submit sample:

<http://www.ehs.colostate.edu/EHSLocate.aspx>

- Water potability analysis, sterile bottles and chemical analysis through Larimer County Health Dept. <https://www.larimer.gov/halth/environmental-health/drinking-water-sampling>

Location to pick up sterile bottle and submit sample: **1525 Blue Spruce Drive, Fort Collins, CO 80524**

- Chemical /heavy metal analysis of well water and source of sterile bottles for potability test.
<https://agsci.colostate.edu/soiltestinglab/> Submit chemical analysis to this lab by mail.

Request sterile sample bottle to be sent to you for potability analysis. You then hand-carry your potability sample directly to CSU lab or through Larimer County Environmental Health. Don't mail.
